

DANA[®]

A brand of JELD-WEN

OPEN. TO.
MY INCOMPARABLE DOORS.

OPEN. TO.

**AN ENTIRELY
NEW DOOR
EXPERIENCE.**

Open invitation: [DANA.at](https://dana.at)

Of course, a door by DANA is beautiful to look at. But that's not the only thing that defines who we are. Our ideas for doors go further, break new ground, make premium quality standard and have revolutionised more than just the opening and closing. The result: Not just beautiful doors, but also functions that really do make daily life better.

In this book of doors you'll discover outstanding innovations that you'll only find with DANA. Be open to a new door experience!

Isn't it great when doors surprise us and really do make daily life better?

WE ARE RETHINKERS, NEW THINKERS, FORWARD THINKERS.

We are DANA.

Now we could tell you that we're part of the international JELD-WEN group and make the most popular doors on the Austrian market. But what's far more important is how that benefits you.

Over 45 years' experience and our principle of always imagining the next step for doors result in a constant stream of unique ideas. And when we promise something "unique" this is no mere buzz word: instead it describes our wealth of innovations for opening and closing doors, our high quality standards and door functions that will surprise you.

We are planners and designers, developers and consultants. We take the topic of sustainability seriously at every stage of our work and love it when we surpass ourselves. We are DANA – and what that means for your doors will become clear to you on the pages that follow ...

OPEN. TO.

A NEW DOOR EXPERIENCE.

What defines our doors is so much more than is apparent at first sight. The true advantage of a DANA door is revealed by its most important function: the opening and closing.

No two lives, no two homes, are exactly the same – and that means that the demands made on a door are different too. At DANA, we've given this fact a great deal of thought. Because we realise that no two people use doors in precisely the same way:

Children charge through doors like a whirlwind, while we grown-ups weave our way through rooms laden with bags and suchlike. Whereas safety and calm are priorities in some rooms, in others we want solutions that work very simply or save space.

Our aim has always been to create doors that are right for every room and every set of living conditions. And those who get to know our innovations quickly realise that we do this very successfully, time and time again.

In our book of doors we reveal to you what a door is really capable of. We'd like you to be surprised. We'd like you to be enthusiastic. But there's one thing we'd like above all else: to make your daily life more attractive with our doors!

OPEN. TO.

- Smooth and easy opening – thanks to practical push handles
- Space-saving solution – with Reverso
- More safety and comfort – with DANAmotion
- Even more space to live in – with Swing
- Closing at the touch of a button – with the electric lock
- Peace and noise insulation up to 35 dB – with Silent+

Open. To. A pivotal door experience.

AUFZUDANA.AT

”

Doors provide reassuring protection and are things of true beauty. They bring people closer together – or provide a place to retreat to. In the course of our lives we open or close a door more than a million times.

So choosing the right door is an important decision. **Those who value quality, innovation and experience will soon discover DANA. Because from us you always get that little bit more than “just” a door ...**

SOMETIMES NUMBERS SPEAK LOUDER THAN WORDS.

DANA – more than a door.

DAYS
of our lives are spent opening
and closing doors

4,954
YEARS'
experience of helping customers

480,000
DOORS PRODUCED
per year

356,720
TIMES
is how often a door is opened
or closed in its lifetime

15,000
HOURS
of development per year (1,000
test certificates in total)

For more on sustainability certificates, visit DANA.at

OPEN TO NEW NATURALNESS.

DANA – healthy living all along the line.

Every stage of the work DANA does is geared towards protecting the environment. And when we say “every”, we mean “every” – from car-sharing on the way to work to the woods and varnishes we choose.

So what do you get out of it? A good feeling all round – and doors that genuinely contribute to a healthy atmosphere, indoors and out!

- Wood and wood materials **sourced from sustainable forestry**
- Traceable wood origin – awarded the **FSC®** and **PEFC™** certificates
- Use of **low-emission products**
- **Resource-conserving production** – from transportation to manufacture
- **Efficient energy management** thanks to continuous monitoring
- **Healthy living environments** as confirmed by **Holzforschung Austria**
- **Made in Austria**
- Certified quality: **ISO 9001**

PLANNING FROM THE INSIDE OUTWARDS LETS YOU LIVE OUT YOUR IDEAS.

7 steps to a new door experience.

Start thinking about doors at the planning stage.

That's the golden rule for all house-builders! There are many questions that need asking right at the start so that every idea can be realised.

- Do you want your door to be an eye-catcher or to discreetly match the decor?
- Where is the hinge, how big is the swing angle?
- What format should the door have? (e.g. ceiling height, double leaf etc.)

Know your style.

Ask yourself what style you want to characterise your home. That doesn't mean you can never stray from it, on the contrary. But a basic direction should be clear. More from page 40.

What style will you still want to be living with in ten years' time?

Take a look round where you're living now: What do you like, what do you not like so much?

Decide on a basic direction e.g. timeless.

Fall in love with the details.

You have the door handle or knob in your hand several times a day. So it not only needs to look good, but to feel great and suit the door! More from page 109.

- Do you prefer simple handles, recessed handles or push handles?
- Would you like custom-made designs? (e.g. flush, same design as the door etc.)

3

Let the effect of our doors sink in.

Most furnishing decisions are made instinctively, on the spur of the moment. That's why you should study our doors and see how they make you feel – ideally in our showrooms.

More on page 130 and at schauraum.dana.at

- Need **comprehensive guidance**? No problem! Arrange an **appointment** with our sales team today – **you can do it online!**
- Need **time & quiet**? No problem either – with a VIP card you can visit our showrooms whenever you wish.

4

The right door for every room.

Whereas safety and calm are priorities in some rooms, in others we want solutions that work very simply or save space.

- Who is going to use the door and how should it open? (e.g. swing, slide)
- Would you like **particular functions**? (e.g. Silent+, humidity protection etc.)

YOUR PRACTICAL DOOR CHECK-LIST

Available at dana.at/tuerencheckliste

Give your door the most attractive frame.

Like a picture frame, the door frame contributes to the overall impression your DANA door makes. That's why we have a frame to suit every model – from page 122.

- Should the **frame determine the door design**?
- Should the door, wall and casing be flush or on different levels?

5

6

Prepare yourself for a surprise!

This is probably the most enjoyable part: because at DANA you experience innovations that no other door offers. More from page 16.

- Discover **DANAmotion** for soft opening and closing, the space-saving wonder **Swing**, our clever **smartClose System** and much more!

OPEN. TO.

**DOORS THAT
DELIGHT US AFRESH
EVERY DAY.**

Open invitation: [DANA.at](https://www.dana.com)

There are some doors that are simply a nice way of connecting two rooms. But we want more! We want solutions that amaze you, that add even more beauty to your daily life, that treat you to premium quality and comfort. That's why we have taken our doors to the next level and have come up with innovations that are unique and "unmistakably DANA".

The next pages could change how you see doors and dramatically increase your demands. And to be perfectly open with you, that's precisely what we intend.

DANAMOTION

No slammed doors, no danger.
For details, see p. 21

KONTEXT

Simple, no frills and flush-fitting.

free space, see p. 30

DANAMOTION EASY

Transparently more safety.
All the advantages on p. 22

[AUFZU.DANA.AT/INNOVATIONEN](https://aufzu.dana.at/innovationen)

Modus 4 white matt

DANA

42
mm

TÜRENSTÄRKE PLUS

Even longer-life and sturdier doors – as standard!

Our Türenstärke Plus makes premium quality standard: The door leaf of every DANA door is 42 mm thick – that's nearly 10% thicker than usual in the trade. What's more, a four-sided solid wood frame increases the quality and strength of your doors still further – at no extra cost!

- Even greater **stability** thanks to the high-quality, now four-sided solid spruce frame
- Even **more durable** doors: even more inherent stability
- Even more closing comfort: the door closes **snugly and firmly**.
- 42 mm door leaf thickness as new premium standard

tuerenstaerkeplus.dana.at

Apart country oak

DANAMOTION

No slammed doors, no danger.

Sometimes powerful innovations are also very gentle: With DANAmotion, slammed doors, danger from doors bursting open uncontrollably and doorstops are things of the past:

- Automatic, smooth **stopping when opening**
- **Automatic soft closing**
- Stops at a preset opening angle (variable from 90° to 105°)
- The door also stays completely closed without a lock – for a particularly elegant look
- If desired, lockable with a push-button electric lock or chip card

aufzu.dana.at/danamotion

ALL-GLASS SOFT-SHUT DOOR.

DANAMOTION EASY

More safety for all-glass doors.

DANA presents DANAmotion Easy, the unobtrusive but effective innovation for all-glass doors: no more slammed or swinging doors; the dangers of doors flying open uncontrollably are now a thing of the past.

- **No slamming** of all-glass doors
- No uncontrolled flying open of doors
- **No doorstep** needed
- Automatic, slightly **cushioned stopping** when opening
- Automatic, slightly cushioned closing
- Stops at a preset opening angle (variable from 90° to 140°)
- Can be combined with GT-Kontext Standard and every other door in the Kontext range (see p. 27)

SMARTCLOSE

keeps the door shut –
without a conventional lock.

Modus 4

SMARTCLOSE

The smart way to close a door.

DANA smartClose **cushions the door** when it is closed and keeps it shut. This automatic shutting mechanism means **locks and conventional handles are no longer needed**. So you have even more scope with your designs and can, for example, choose elegant push or recessed handles.

- Stays shut even without a latch – for example with a push or recessed handle
- Gentle closing like that of kitchen drawers
- Extremely unobtrusive: the system is almost invisible once installed
- More design flexibility when choosing a handle because no lock is necessary
- On all-glass doors the holding mechanism is concealed behind an elegant covering strip
- If desired, lockable with a push-button electric lock or chip card

aufzu.dana.at/smartclose

Nizza push handle, inlay white
with integrated sensor for electric lock

The lock as a
DESIGN HIGHLIGHT.

ELECTRIC LOCK

And keys are no longer needed.

Many people find large key rosettes or escutcheon plates on doors unsightly. Nevertheless, there are rooms in the home that it would be good to be able to lock. Here, the DANA electric lock offers new possibilities: it locks the door at the touch of a button or by chip card.

- Particularly **easy to lock** – a touch of a button is all that's needed
- Wider range of designs irrespective of stipulated, conventional handle sets
- **Almost invisible** mechanism
- Easy and secure access
- Fitted in the handle itself, or as an unobtrusive lock button or with a chip card

aufzu.dana.at/elektroschloss

SWINGS TO THE SIDE
when opened.

Struktura
cracked oak brown

SWING

Even more space to live in.

Swing doesn't just open, it "swings" to one side on the concealed rail. The door leaf reaches into both rooms. A real experience – and a real **space saver!**

- Especially space-saving:
the door leaf can swing into both rooms
- More planning freedom thanks to the new door opening system
- Ideal wherever a **sliding door** is not feasible
- Cushioned closing
- Can stand open in various positions
- Passing through possible from both sides

aufzu.dana.at/swing

Struktura cracked ash pura

A SURPRISING WAY
of opening.

REVERSO

The space saver that springs a surprise.

Flush-fitting doors are ideally suited to a puristic interior design. Usually they open “inwards”, into the room – but this isn’t always appropriate, e.g. in narrow hallways. With Reverso, you can now express your style everywhere: **opening into the passage, which takes up so much space, is avoided**; the room has a more harmonious feel.

- The door surprisingly opens into the next room
- Ideal for narrow hallways or rooms where space is at a premium
- Elegant appearance: door leaf and casing are flush – as with conventional flush-mounted doors that open forwards
- Striking design and space-saving
- Guaranteed wow-effect when it’s opened
- Depending on the model it can be fitted with the DANAmotion system for cushioned opening and closing
- Also available as an all-glass door

aufzu.dana.at/reverso

KONTEXT

Simple, no frills – yet so eye-catching.

Kontext really melts into the wall: **no casing, no hinges** are visible. This is not just modern and aesthetically pleasing – it also makes cleaning easier since no dust can gather on the casing.

- If desired, completely flush-fitting and with recessed handle
- Can be painted or papered to match the design of the wall – but is also available in every door design
- Door opens outwards and inwards – same design on both sides
- Can also be fitted with the DANAmotion Easy system for cushioned opening and closing
- Also available as a ceiling-height version, as an all-glass door or Charisma moulded glass door (from p. 84)

aufzu.dana.at/kontext

INTERIOR SYSTEM

The new freedom in door design.

Those who prefer flush, clear forms will love this DANA innovation: the casing is replaced with a panel frame that can be fitted either in front or in the middle of the wall space **as desired**. That means you can decide on the building site which version you prefer. If the frame is placed in the middle a new, reduced stylistic idiom is created.

- **Flush-mounting** in a new form: nothing protrudes into the room anymore – no handle, no knob
- Even more flexibility: You decide where the frame should be fitted
- With the DANA magnetic lock for soft and quiet closing
- The door and frame form one flush surface
- With concealed hinges
- With a subframe if desired (p. 122)
- Also available as an all-glass door or ceiling-height version

aufzu.dana.at/interior

GT Float – flush-mounted

NIVELO

Flush-mounting, done with glass.

Flush doors have become an essential part of modern interior design – and at DANA they are now also available in an all-glass version! **Door, casing and hinges merge** into a single unit making rooms look bigger, brighter, more inviting. That is the future of glass doors, available today at DANA.

- Brings the trend of a reduced stylistic idiom to the all-glass door
- Door leaf, hinge and casing are all flush
- A design highlight for expansive, bright living space
- **Soft and quiet closing** with an elegant closing system: a discreet magnetic strip, invisible when the door is closed, keeps the door shut
- With all the advantages of our all-glass doors – more details from p. 98

aufzu.dana.at/nivelo

DISAPPEARS
completely into the wall.

Mondria all-glass door

INSIDE

For endless free space.

A sliding door that **completely vanishes into the wall** when opened? DANA Inside makes it possible!

- Slides into the wall – door vanishes completely
- Maximum clearance width, more room to move
- With **DANAmotion system**
- Available in numerous designs
- Available as a solid door or all-glass door
- You will find more sliding door solutions from p. 92

aufzu.dana.at/inside

WAFFER THIN & UNIQUE

New: the flattest rosette on the market – only 0.8 mm.

ELEGANTLY PURISTIC

in every detail: the most minimalist locking mechanism on the market.

Flatfix Denver with pin lock

FLATFIX HANDLES

The ingenuity of simplicity.

“Less is more” – our Flatfix handles underline this motto beautifully. We have taken the trend towards reduction to extremes: the wafer thin, 0.8 mm stainless steel rosette lies **virtually flush** with the door leaf – and that on both sides.

- Elegantly smooth appearance, **not only ideal for flush-fitting doors**
- Version available with pin lock (discreetly integrated in the rosette), with key or keyless – no more lost keys or exasperating searches
- Extremely **scratch-proof and durable**
- With round or rectangular-rounded **stainless steel rosettes** or matt black rectangular-rounded rosettes
- A **design highlight for the same price as a standard version**

ALL HANDLES

and locking mechanisms from p. 109.

aufzu.dana.at/flatfix

Palais white matt

A DESIGN HIGHLIGHT
at no extra cost.

TWIN HINGES

Elegance down to the smallest detail.

To lend your door support and ensure it moves flawlessly in the frame it is hung on hinges. For some people this is a tiny detail – at DANA it's a stylish eye-catcher: thanks to our **high-quality twin hinges** in a stainless-steel-look!

- All hinges have the same look for a harmonious overall impression, for both standard and functional doors
- Tremendous flexibility: even after installation the door is **easy to adjust**
- Perfectly matches all fittings
- A design highlight with a **high-quality surface**
- Also available in matt black

aufzu.dana.at/twinband

DESIGN HINGE
as standard on all
grooved doors.

Modus 4 white matt

SILENT+

For even more peace and comfort.

The DANA SILENT+ package is ideal for those parts of the home where noise levels are higher – from the kids' room to the room with the clanking washing machine.

- **Noise protection** to up to 35 dB – (compared to a standard interior door which can cope with 20 dB)
- Adds calmness and harmony to the room
- With **sound-absorbing insert** and **drop-down seal**
- **Improved dimensional stability** thanks to the reinforced door frame
- Almost every DANA door can **easily be modified** with the SILENT+ package
- Can also be combined with the PROTECT+ package (see p. 34)

aufzu.dana.at/silentplus

Dual 310 white matt

STAYS STRONG –
thanks to the reinforced door frame.

PROTECT+

For even greater stability.

The DANA PROTECT+ package is ideal for rooms in which humidity can temporarily increase, for instance the bathroom or utility room.

- Special solution for **temporary humidity increases**
- **Improved dimensional stability** thanks to the reinforced door frame
- **Coated bottom edge of the door leaf** – significantly better resistance to moisture absorption
- Almost every DANA door can **easily be modified** with the PROTECT+ package
- Can also be combined with the SILENT+ package (see p. 33)

Euroba country oak planked

More than just a material: veneer is a wonderful “effect material” that allows wood to be seen in a new light – again and again.

THE BEST OF WOOD.

Real wood veneer doors by DANA.

The history of wood veneer goes back thousands of years: the ancient Egyptians were already enhancing their furniture with it. Hardly surprising, since veneers are undoubtedly the most elegant things that wood can offer.

It's as if the essence of a tree has been pressed into fine sheets.

The best of the tree is worked into wafer thin sheets that enhance the appearance of your DANA door like a second skin. They are warm, vibrant, multifaceted and at the same time particularly economical. Unique items of the kind that only nature can produce. We love to play with the structures of veneer and to constantly highlight its beauty in new ways. It is in veneer that the whole breadth of the quality of our craftsmanship is revealed.

An outstanding product deserves outstanding appreciation.

As a member of the Initiative Edelfurnier we aim to move others to share our enthusiasm and place the importance on this wonderful material that it deserves.

Find out more at [edelfurnier.at](https://www.edelfurnier.at) and discover the wonderful world of our veneer doors from page 45.

OPEN. TO.

INSPIRING WORLDS OF STYLE.

Open invitation: [DANA.at](https://www.dana.at)

A room becomes a room for living in once you have rescued it from anonymity. Designed it according to your wishes, put your own personal stamp on it. And a door opens up so many opportunities to do this: it may be plain, have a rustic look or win you over with its unusual texture or notches and grooves.

We have gathered our doors together for you in inspirational styles. Though of course we have no intention of pigeonholing you. No style can be described in a single word – life is too colourful and varied for that. But maybe it will give you new ideas and even more fun making your selections!

**OPEN. TO. DOORS THAT REALLY
DO ADD BEAUTY TO LIFE.**

A home where life is lived to the full. Rooms that the whole family can enjoy. The doors offer an open invitation to play, romp and enjoy time together. They also offer an opportunity to retreat into a peaceful space. High-quality, healthy materials provide a climate of well-being.

**EVEN MORE
POSSIBILITIES.**

Open invitation: [DANA.at](https://www.dana.com)

To live out your style you need maximum choice. And that applies to the smallest details too: the casing, frame and handle are just as important to us as the surface of a door leaf. An attractive handle can also be a source of daily pleasure, which makes it so much more than “just” a fixture.

On the following pages, discover our large assortment that makes your door something absolutely individual.

THE SAME BUT DIFFERENT.

SLIDING DOORS

Room for possibilities.

Sliding doors are the grand masters of flexibility: they split rooms without dividing them permanently. Sliding doors are also real space savers – and they are available from DANA in many variations, from all-glass to solid wood, and in a variety of systems.

You want the sliding door to

VANISH COMPLETELY INTO THE WALL?

More on page 30.

FRONT

Elegantly hidden.

- Straight-edged covering strip
- For solid and all-glass doors
- Finish for solid doors: choose between anodised stainless-steel-look, matt black, veneered or varnished
- Finish for all-glass doors: choose between anodised stainless-steel-look, matt black or matt white
- With DANAmotion system
- Available with casing or without
- Optionally lockable

FRONT: with anodised stainless-steel-look covering strip and solid door

FRONT/GT SLIDING DOOR SYSTEM
runs in front of the wall

VW-COMPACT

Design wall spacer profile.

- For single-leaf or double-leaf sliding doors
- Narrow design profile
- For solid and all-glass doors
- Finish: EV1 silver
- With DANAmotion system

VW-Compact/GT sliding door system, runs in front of the wall

TOP-COMPACT

For rooms flooded with light.

- Rail is fitted in the wall space
- For double-leaf sliding doors: combines fixed glass element and all-glass sliding door
- Finish: EV1 silver
- Perfect when space in adjacent rooms is limited
- With DANAmotion system

TOP-COMPACT/GT-1S sliding door system runs in the wall opening

SURFACES AT DANA.

Diverse and truly beautiful.

From elegant to rustic, finely textured or with cracks “as nature intended” – choose from a wide range of surfaces the one that perfectly suits your own individual style. Customise every little detail of your interiors just as you like and make even opening your doors an experience to savour – every time.

Choose from:

- **Solid wood**
- **Wood veneer**
- **Brushed wood veneer – Struktura**
- **Brushed wood veneer with natural cracks – Struktura**
- **Brushed wood veneer, white oiled or varnished in white – Struktura**
- **Partially textured varnished doors**
- **Varnished doors**
- **Glass (from p. 98)**

BRUSHED WOOD VENEER – STRUKTURA

BRUSHED WOOD VENEER WITH NATURAL CRACKS – STRUKTURA

STRUKTURA SURFACES

- Wood for all five senses
- Brushed for that special texture
- “Crack” finish: natural cracks in the wood in contrasting colours produce stunning effects
- High-grade and elegant
- Oiled surfaces: naturalness that appeals to all five senses

BRUSHED WOOD VENEER, WHITE OILED OR VARNISHED IN WHITE – STRUKTURA

Note: The colours of natural coating finishes differ from those of oiled surfaces.

PARTIALLY TEXTURED VARNISHED DOORS

KONTURA

KONTURA SURFACES

- A beautiful diversity: details accentuated over parts of the surface create an attractive texture and interesting lighting effects
- Fine, relief-like texture
- Surface larch, partially white varnished

TEXTURA

TEXTURA SURFACES

- Every touch a new experience: with a strongly accentuated texture
- Prominent relief-like surface
- Embossed reed effect

Experience these door designs on p. 57.

AT ONE OF OUR DANA SHOWROOMS!

All-glass door, milk glass

NORMAL
FLOAT GLASS

MILK GLASS

BRIGHT AND CHEERFUL.

Every type of glass has its own advantages. Clear glass, for instance, has its typical greenish tinge, while in milk glass there is almost no hint of green at all. Many DANA all-glass doors, glass cutouts and glass sliding doors are now available in milk glass!

- A modern, exceptional look
- Perfectly suited to all sorts of modern interior styles
- Better at letting light and warmth through – ideal in rooms with no natural light source

FIRST-GLASS DESIGN FROM DANA.

Milk glass for even more light and elegance.

BASIC GLASS TYPES

○ **FLOAT GLASS** (clear glass) or
FLOAT MILK GLASS (clear glass)

● **SATINATO GLASS** or
MILK GLASS SATINATO

HOW THE GLASS GETS ITS PATTERN

● **PRINT DESIGN FROSTING**

The pattern is melted into the glass at 700 °C and is durable, easy to clean and sparkling.

⊗ **GROOVE CUT**

The popular finishing technique for an interesting texture and relief look.

⊗ **LASER TECHNIQUE**

The patterns are cut into the glass by laser – the surface stays smooth and very easy to clean.

FLATFIX HANDLES ARE DIFFERENT.

Embrace a whole new world of minimalism.

Our Flatfix handles catch the eye without being intrusive: they have a modern, stripped-down design and appear on both sides as virtually flush. On the following pages, discover them in all their beauty and diversity!

- Flatfix rosette only 0.8 mm thick
- With round or rectangular-rounded **stainless steel rosettes** or matt black rectangular-rounded rosettes
- A design highlight for the price of the standard version

MORE DETAILS ABOUT
FLATFIX ON P. 31.

THE RIGHT FRAME.

Casing, frame, panel frame: What others often see as just a necessary part of the construction is an important design element to us! After all, we don't just want to give your door support: we also want to make it match your style and your rooms. On the next pages, discover our solutions for all sorts of fitting constellations – and don't be shy of contacting our showroom staff or DANA partners with your questions!

MORE THAN A DETAIL.

The casing for your door.

Like the frame that surrounds a painting, the door frame contributes to the overall impression your DANA door makes. At the planning stage, first choose the built-in version: should the door, wall and casing be flush or on different levels? There are also many options for the style of casing, from clear-cut angles to rounded edges. In this way your style extends to every detail of your home!

Casing single leaf,
double leaf

RZ

Ceiling-height frame with cross rail but without transom up to a clear frame height of 2,520 mm (single leaf, double leaf)

RZ

Ceiling-height frame with cross rail but without transom, with top panel up to a clear frame height of 2,520 mm (single leaf, double leaf)

RZI

Ceiling-height frame without cross rail and transom up to a clear ceiling height of 2,600 mm (single leaf, double leaf)

RZI

Ceiling-height frame without cross rail and transom, with top panel up to a clear ceiling height of 2,600 mm (single leaf, double leaf)

RZA

Ceiling-height frame with crossbar, transom and fanlight up to a clear frame height of 2,520 mm (single leaf, double leaf)

RZH

Ceiling-height frame without cross rail, with transom and fanlight up to a ceiling height of 2,600 mm (single leaf, double leaf)

with rounded edges

How should the door and casing look?
Discover all the possibilities on p. 37.
Our casing-less

KONTEXT DOOR SYSTEM is described on p. 27.

ENTRY DOORS BY DANA.

Protecting and welcoming.

The entry door is the gateway to our own highly personal world. It should be an attractive highlight at the entrance to our homes, inviting to visitors while at the same time providing the security and thermal insulation we need. We have created the perfect combination of stylishness and functionality, paying attention to the smallest detail.

- **Outstanding thermal insulation** – suitable for passive houses ($U = 0.74 \text{ W/m}^2\text{K}$)
- **Hard-wearing and easy-to-clean** 2-mm surface layers in many colours and designs – maintenance-free, light- and colourfast
- Door leaf and frame flush-fitting both inside and out
- **Advanced security system** up to class 3 burglary resistant
- Noise insulation up to 42 dB
- Extremely hard-wearing and moisture-resistant cast resin edge – with 2-colour option
- Glass bead for glass inlays, side lights and transom light in elegant stainless-steel-look – virtually flush-fitting
- Innovative fingerprint system or code buttons for maximum security – can also be extended to all other exterior doors

SIDE ENTRY DOORS.

More than a side issue.

Many houses have more than one entrance, whether these are the classic side entry from the garage or carport or from the front door of a flat into a covered access balcony in apartment blocks. At DANA, we understand the many different requirements, and here too we offer advantages in design, functions and above all security.

- **Hard-wearing and easy-to-clean** surface layers in a wide range of colours and designs
- Optional fire protection
- **Advanced security system** up to class 3 burglary resistant
- Excellent **thermal insulation** ($U = 1.1 \text{ W/m}^2\text{K}$)
- Noise insulation up to 43 dB or optionally 45 dB
- Extremely hard-wearing and moisture-resistant cast resin edge – with 2-colour option
- Available with innovative fingerprint system or code buttons as an option

ENTRANCE DOORS FOR FLATS WITH SECURITY SYSTEM.

More security at home.

DANA also attaches great importance to the subject of entrance doors for flats since their occupants also want to have the feeling that they are safe and secure in their homes and give their visitors a stylish welcome.

- **Advanced security system** up to class 3 burglary resistant
- Various **models available** – find the right door for your needs
- Available with glass cutouts, side lights and transom as options. Safety glass used according to the class of burglary resistance chosen
- Available grooved or as Modul
- Complies with **climate class C**
- Available with innovative fingerprint system as an option for maximum security

ASK YOUR DANA
SALES PARTNER!

PROPER CARE.

The DANA oil care and basic set.

We want you to get the best out of your DANA doors for a long time and enjoy the look of them every day. That's why we also offer you the care products you need.

Because we know precisely what each door needs, we have put together a basic set for your interior doors and an oil care set for oiled surfaces (e.g. Struktura).

Savour the elegance of your DANA doors – for years to come!

WE LOOK FORWARD
TO YOUR VISIT!

OUR TIP:

Please make sure you arrange an appointment before you go. Then we'll be able to devote more time to you. More at schauraum.dana.at

OPEN. TO. NEW VIEWS AND INSIGHTS.

Our book of doors has shown you the world of DANA. But there is so much more to discover and experience.

Be amazed and take advantage of the professional guidance offered by DANA. If you're building a house you should come and see us at the planning stage. Because it's been shown time and time again: only if you are aware of all the possibilities and think about your doors early on will you get the most out of every room.

Whether in person in our showrooms or on the web: we look forward to your visit.
