BOOK OF DOORS

2023/24

BEFORE

stands a decision.

BEHIND

there is a lot going on.

THEREFORE

there is only one door:

DANA.

A DANA door is more than meets that eye at first glance.

BEFORE every purchase comes your decision on how best to use the space.

BEHIND every door is our constant thought process to develop doors that make everyday life better without compromise.

THEREFORE we reinvent doors day after day – and beyond. That is how we make innovative doors, making premium quality our standard while never losing sight of what defines us at DANA: doors with character.

And this world of doors from DANA that you can experience in a unique way in this special Book of Doors.

130 Entry doors

ANYTHING BUT CONVENTIONAL.

The fascinating world of DANA.

Now we could tell you that we are part of the international JELD-WEN group and make the most popular doors on the Austrian market. But what is far more important is what that means to you.

50 years' experience and our principle of always imagining the next step for doors produce unique and unexpected results. In the world of DANA, the extraordinary is standard and simply anything is possible – even meeting small, extremely likeable monsters!

Our DANAs not only resemble doors, they also stand for what DANA is all about: special ideas, enthusiasm and down-to-earth solutions. Enter a completely new world of doors: a world that extends from product development to production and sales, a world that is based in Spital am Pyhrn in Upper Austria, a world where you discover new surprises every day.

There is more about the DANAs at DANA.at

OPEN. TO. Doors that fulfil all expectations.

Discover the door expertise that is deeply rooted in the Pyhrn-Priel region and the Carinthian Gurktal valley and get a sneak preview of the world of DANA.

Let's get started:

LIGHTS OUT, FILM ON!

EVERY HOME A UNIQUE DOOR.

**They open up new worlds, connect spaces and create security
on many levels: our doors.**

BEFORE stands a decision.

Because no two ways of living, no two homes are alike. On the contrary, we all have different requirements for our own four walls – especially for our doors. Some focus on clear door concepts with a flush-fitting look or exciting door designs with stylish surfaces. For others, innovative door functions such as security and soundproofing are an absolute must. But whatever your priorities, one thing always holds true: the sooner you include doors in the planning stage, the more options you will have when you design your home.

BEHIND there is a lot going on.

Here, children tear around the rooms as they play while the grown-ups come in through the doors, worn out after a long day's work. So where innovations like DANAmotion with its cushioned closing are the right choice for some rooms, door models with extra functions like fire protection or burglary resistance perfectly meet safety requirements. Our aim is always the same: to create doors that are right for every room and every set of living conditions.

THEREFORE there is only one door: **DANA**.

In our Book of Doors we give you special insights into our world of doors, introduce you to our innovative solutions and show you how our door designs make your daily life easier.

YOUR advantages:

- Easy opening – thanks to practical knobs and handles
- Matching door designs in narrow corridors – with REVERSO
- More safety and comfort – with DANAmotion
- Save space on both sides opening doors – with SWING
- Quiet and increased sound insulation – with SILENT+ (more on p. 38)
- Improved dimensional stability thanks to reinforced door frames – PROTECT+ (more on p. 39)

OPEN. TO.
a pivotal door experience.

”

Aren't doors fascinating?

We can only guess what is hidden behind them, until we open them. They divide and yet they join. They protect and they hide. They open up new worlds where anything appears possible.

It is this fascination with the subject of doors that inspires us at DANA over and over again to create something special. We want to surprise you every day with our functions, designs and ideas. So that you see doors for what they are: something unique.

SOMETIMES NUMBERS SIMPLY SAY MORE THAN WORDS.

More than just a material:
veneer is a wonderful
“effect material” that allows
wood to be seen in a new
light – again and again.

THE BEST OF WOOD.

Natural surfaces.

The history of wood veneer goes back thousands of years: the ancient Egyptians were already enhancing their furniture with it. Hardly surprising, since veneers are undoubtedly the most elegant things that wood can offer.

It is as if the essence of a tree has been pressed into fine sheets.

The best of the tree is worked into fine layers that enhance the appearance of your DANA door like a second skin. They are warm, vibrant, multifaceted and at the same time particularly economical. Unique items of the kind that only nature can produce. We love to play with the structures of veneer and to constantly highlight its beauty in new ways. It is in veneer that the whole breadth of the quality of our craftsmanship is revealed.

An outstanding product deserves outstanding appreciation.

As a member of the Initiative Edelfurnier we aim to move others to share our enthusiasm and place the importance on this wonderful material that it deserves.

Find out more at edelfurnier.at and discover the wonderful world of our veneer doors from page 52.

BEHIND lies the world of natural materials.

[EDELURNIER.AT](https://edelfurnier.at)

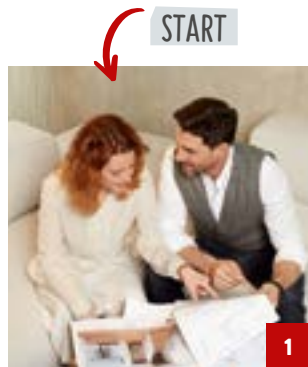

BOOK MATCHING OR PLANKED STYLE?

Find out on p. 101.

PLAN EARLY. REALIZE IDEAS.

7 steps to a new door experience.

Start thinking about doors early in the planning stage.

When planning, there are many questions you need to ask yourself right at the start so that all your ideas can be implemented – the sooner you clarify them, the better! That is the golden rule for all house-builders.

- Do you want your door to be an **eye-catcher** or to discreetly match the decor?
- Where is the **hinge**, how big is the swing angle?
- Do you already have **clear ideas** about room height and door formats? (e.g. ceiling height, double leaf etc.)

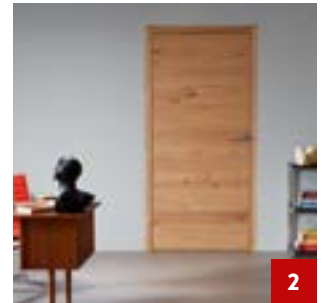

Know your style.

Ask yourself what style you want to characterise your home. That does not mean you can never stray from it, on the contrary. But a basic direction should be clear. More from page 48.

What style will you still want to be living with in ten years' time?

Take a look round where you are living now: **What do you like, what do you not like so much?**

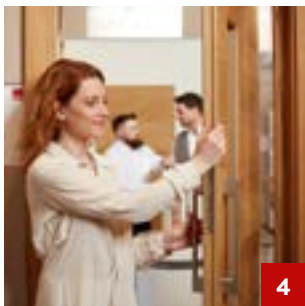

Decide on a **basic direction** e.g. timeless.

Let the effect of our doors sink in.

Most furnishing decisions are made instinctively, on the spur of the moment. That is why you should study our doors and see how they make you feel – ideally in our showrooms. More on page 134 and at dana.at/schauraum

- Need **comprehensive advice**? No problem! Arrange an **appointment** with our sales team today – **you can do it online!**
- Need **time & quiet**? No problem either – with a VIP card you can visit our showrooms whenever you wish.

4

The right door for every room.

Whereas safety and calm are priorities in some rooms, in others we want solutions that work very simply or save space.

- Who is going to use the door and how should it open? (e.g. swing, slide)
- Would you like **particular functions**? (e.g. SILENT+ for much greater noise protection or PROTECT+ for improved protection against air humidity)

Give your door the most attractive frame.

Like a picture frame, the door frame contributes to the overall impression your DANA door makes. That is why we have a frame to suit every model – from page 126.

Should the **frame determine the door design**?

Should the door, wall and casing be flush or on different levels?

5

YOUR PRACTICAL DOOR CHECK-LIST

available at dana.at/tuerencheckliste

Prepare yourself for a surprise!

This is probably the most enjoyable part: because at DANA you experience innovations that no other door offers. More from page 19.

Discover **DANAmotion** for soft opening and closing, the space-saving wonder **SWING**, our clever **smartClose System** and much more!

6

7

Fall in love with the details.

You have the door handle or knob in your hand several times a day. So it not only needs to look good, but to feel great and suit the door! More from page 113.

- Do you prefer **simple handles, recessed handles or push handles**?
- Would you like **custom-made designs**? (e.g. flush, same design as the door etc.)

BEFORE,
BEHIND,
THEREFORE
THE DOOR.
DANA.

BEFORE
a thought grows.

BEFORE
lives an idea.

BEFORE
stands a decision.

BEHIND
lies our vision to
reinvent doors.

THEREFORE
we create something
unique: **DANA** innovations.

[DANA.AT/INNOVATIONS](https://dana.at/innovations)

MODUS 4 white matt

42
mm

TÜRENSTÄRKE PLUS

Even longer-life and sturdier doors – as standard!

Our Türenstärke Plus makes premium quality standard: The door leaf of every DANA door is 42 mm thick – that is nearly 10% thicker than usual in the trade. What is more, a four-sided solid wood frame increases the value and strength of your doors still further – at no extra charge!

- Even greater **stability** thanks to the high-quality, four-sided solid spruce frame
- Even **more durable** doors: even more inherent stability
- Even more closing comfort: the door closes **flush and evenly**
- 42 mm door leaf thickness as premium standard

dana.at/tuerenstaerke-plus

STOPS

at the preset angle.

APART country oak

TÜRENSTÄRKE+ | DANAMOTION

DANAMOTION

No slammed doors, no danger.

Sometimes powerful innovations are also very gentle: With DANAmotion, slammed doors, danger from doors bursting open uncontrollably and doorstops are things of the past:

- Automatic, smooth **stopping when opening**
- **Automatic soft closing**
- Stops at a preset opening angle (variable from 90° to 105°)
- The door also stays completely closed without a lock – for a particularly elegant look

dana.at/danamotion

Float all-glass door

ALL-GLASS
SOFT-SHUT DOOR.

DANAMOTION EASY

More safety for all-glass doors.

DANA presents DANAmotion Easy, the impressive innovation for especially elegant all-glass doors: no more slammed or swinging doors; the dangers of doors flying open uncontrollably are now a thing of the past.

- **No slamming** of all-glass doors
- No uncontrolled flying open of doors
- **No doorstep** needed
- Automatic, slightly **cushioned stopping** when opening
- Automatic, slightly cushioned closing
- Stops at a preset opening angle (variable from 90° to 110°)
- Can be combined with GT-Kontext Standard and every other door in the Kontext range (see page 29)

dana.at/danamotion-easy

SMARTCLOSE

keeps the door shut –
without a conventional lock.

MODUS 4

DANAMOTION EASY | SMARTCLOSE

SMARTCLOSE

The smart way to close a door.

DANA smartClose **cushions the door** when it is closed and keeps it shut. This automatic shutting mechanism means **locks and conventional handles are no longer needed**. So you have even more scope with your designs and can, for example, choose push or recessed handles.

- Stays shut even without a latch or door lock – for example with a push or recessed handle
- Gentle closing like that of kitchen drawers
- Extremely unobtrusive: the system is almost invisible once installed
- More design flexibility when choosing a handle because no lock is necessary
- On all-glass doors the holding mechanism is concealed behind an elegant covering strip

dana.at/smartclose

**SOFT-
CLOSING DOORS
ARE A DREAM.**

That comes true with
smartClose.

P-MOTION

now also available
as an all-glass door.

P-MOTION

Swings and stops gently in both directions.

The new swing door corner hinge for solid doors (VB) and all-glass doors (GT) features impressive convenience and design. The integrated hydraulic damping gently brakes the door when closing to prevent the oscillation that occurs on a conventional swing door.

- Door can remain open at an angle of 90° in either direction
- **Adjustable hydraulic damping** gently brakes the door in both directions when closing
- **No oscillation**
- Swing doors that are far more convenient than before
- Hinges for P-Motion solid doors: when the door is closed, the hinges are almost invisible and are discreetly in the background when the door is open
- Hinges for P-Motion all-glass doors: Available in modern stainless steel and black matt finishes
- Mountings are also compatible with underfloor heating

dana.at/pmotion

IN-FLOOR
MOUNTING.

SWINGS TO THE SIDE
when opened.

STRUKTURA
Cracked oak brown

P-MOTION VB | SWING

SWING

Even more space to live in.

SWING does not just open, it swings to one side on the concealed rail. The door leaf reaches into both rooms. A real experience – and a real **space saver!**

- Especially space-saving: the door leaf can open into both rooms like a swing door
- More planning freedom thanks to the new door opening system
- Ideal wherever a **sliding door** is not feasible
- Cushioned closing
- **Can stand open in various positions**

dana.at/swing

STRUKTURA cracked ash Pura

A SURPRISING
way of opening.

REVERSO

Ideal for narrow reception areas.

Flush-fitting doors are ideally suited to a puristic interior design. Usually they open “inwards”, into the room – but this is not always appropriate, e.g. in narrow hallways. With REVERSO, you can now express your style everywhere: **opening into the passage, which takes up so much space, is avoided**; the room has a more harmonious feel.

- Elegant appearance: door leaf and casing are flush – as with conventional flush-mounted doors that open forwards
- Striking design and space-saving – the door leaf is not in the way
- The door surprisingly opens into the next room
- Depending on the model it can be fitted with the DANAmotion system for cushioned opening and closing
- Also available as an all-glass door

dana.at/reverso

Door and wall in one colour

KONTEXT

Simple, no frills – yet so eye-catching.

KONTEXT really melts into the wall: **no casing, no hinges** are visible. This is not just modern and aesthetically pleasing – it also makes cleaning easier since no dust can gather on the casing.

- If desired, completely flush-fitting and with recessed handle
- Can be painted or papered to match the design of the wall – but is also available in every door design
- Opens either inwards or outwards with the same appearance
- Optional DANAmotion Easy: softens opening & closing
- Also available as a ceiling-height version, as an all-glass door with glass cutout featuring selected types of glass, or as Charisma moulded glass door (from page 80)
- With the same appearance, now also available as an entry door (KONTEXT 66) which is burglar resistant, fire and noise proof, in the corresponding climate class or designed as a DANA SMART DOOR
- Kontext frame available with anodised aluminium surfaces, in white and now also in black matt

THEREFORE
there are
many possible
variations
from p. 92

dana.at/kontext

STRUKTURA
Cracked oak brown

INTERIOR SYSTEM

The new freedom in door design.

Those who prefer flush, clear forms will love this DANA innovation: the casing is replaced with a panel frame that can be fitted **flexibly** either in front or in the middle of the wall aperture. That means you can decide on the building site which version you prefer. If the frame is placed in the middle, a new, reduced stylistic idiom is created.

- **Flush-mounting** in a new form: nothing protrudes into the room any more – no handle, no knob
- Even more flexibility: You decide where the frame should be fitted
- With the DANA magnetic lock for soft and quiet closing
- The door and frame form a flush surface on both sides
- With concealed hinges
- With a recessed frame if required (page 129)
- Also available as an all-glass door or ceiling-height version

dana.at/interior

STRUKTURA knotted oak white oiled

INTERIOR | CEILING HEIGHT DOORS

CEILING-HEIGHT DOORS

The epitome of modern living.

Ceiling height door elements give rooms that certain something. That is why they are available from DANA for the entire range of doors. For special, eye-catching appearance, highlighted with features such as a transom, glass skylight or top panel.

- **Available for all door types and surfaces** – matching your style and design requirements
- **Design freedom:** flush with the surface, at one with the wall or with glass cut-outs
- Ceiling-height or extra-high doors create a **feeling of space** – even in small rooms
- Should ideally be **designed into the planning phase of the house**
- **Improved dimensional stability** thanks to the 4-sided standard solid wood frame made by DANA

dana.at/raumhohe-tueren

GT Float – flush-mounted

NIVELO

Flush-mounting, done with glass.

Flush doors have become an essential part of modern interior design – and at DANA they are now also available in an all-glass version! **Door, casing and hinges merge** into a single unit making rooms look bigger, brighter, more inviting. That is the future of glass doors, available today at DANA.

- Brings the trend of a reduced stylistic idiom to the all-glass door
- Door leaf, hinge and casing are all flush
- A design highlight for expansive, bright living space
- **Soft and quiet closing** with an elegant closing system: a discreet magnetic strip, invisible when the door is closed, keeps the door shut
- With all the advantages of our all-glass doors – more details from page 102

dana.at/nivelo

DISAPPEARS
completely into the wall.

Mondria all-glass door

NIVELO | INSIDE

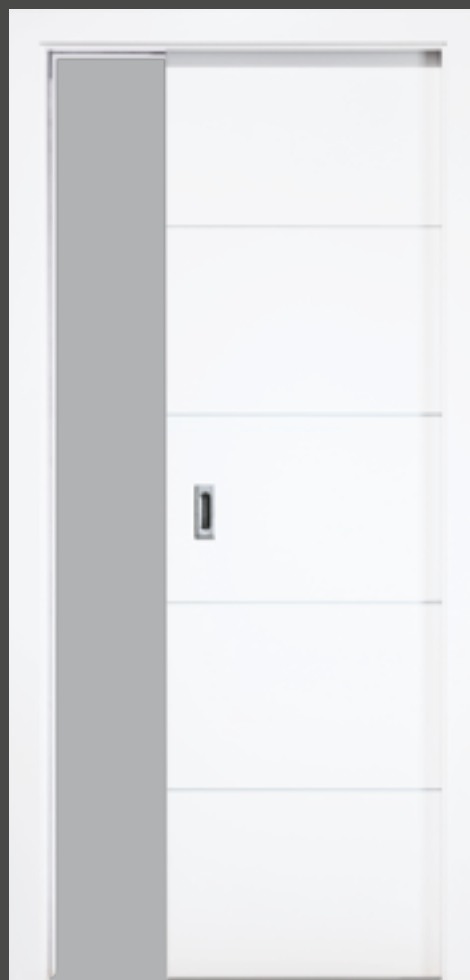

INSIDE

For endless free space.

A sliding door that **completely vanishes into the wall** when opened? DANA INSIDE makes it possible!

- Slides into the wall – door vanishes completely
- Simply pull the handle to slide out of the wall
- Maximum clearance width, more room to move
- With **DANAmotion System**
- Available in numerous designs
- Available as a solid door or all-glass door
- You will find more sliding door solutions from page 86

dana.at/inside

WAFER THIN & UNIQUE

New: the flattest rosette on the market – only 0.8 mm.

ELEGANTLY PURISTIC

in every detail: the most minimalist locking system on the market.

FLATFIX Amsterdam

FLATFIX HANDLES

The ingenuity of simplicity.

"Less is more" – our FLATFIX handles underline this beautifully. We have taken the trend towards reduction to extremes: the wafer-thin, 0.8 mm stainless steel rosette lies **virtually flush** with the door leaf – on both sides.

- Elegantly smooth appearance, **not only ideal for flush-fitting doors**
- The following versions are possible:
 - With **key or keyless**
 - Keyless **with a pin lock**: discreetly integrated in the rosette, make lost keys or tedious searching for keys a thing of the past
- Extremely **scratch-proof and durable**
- With round or rectangular rounded stainless steel rosettes or with **black matt rectangular-rounded rosettes**
- A **design highlight for the same price as a standard version**

HANDLES

and locking mechanisms
from page 113

Locking button in push handle
ELEGANTLY INTEGRATED.

Nizza 300 push handle
with integrated lock button

FLATFIX | EASY HOLD

EASY HOLD

New, innovative technology for push handles.

Push handles are very much in vogue and are now available at DANA with an innovative locking function. The DANA EASY HOLD system for the Nizza push handle, for example, features an impressive locking function with DANA's new magnetic technology.

- The magnetic system **automatically holds the door shut**
- The **DANA EASY HOLD system** with Nizza push handle can be used with all DANA **solid swing door elements**
- Particularly convenient locking with a discreet locking button is available as an option: the lock and emergency release are **integrated directly in the Nizza push handle**
- **Almost invisible** mechanism
- These push handles are available with **stainless steel look** and **black matt** finishes

dana.at/easy-hold

ELEGANT LOOK &
SMOOTH CLOSING.

MAGNETIC LOCK

Closes gently.

If desired for especially soft closing – with the simple elegance of FLATFIX handles. The latch remains retracted while the door is open and then extends automatically thanks to the integrated magnets when the door closes.

- Modern, smooth closing action
- Standard on flush-fitting doors
- More elegant appearance with grooved doors – optional
- More discreet strike plate
- **No wear on the strike plate in the frame** – wear-free
- Lock forend and strike plate in stainless steel or black matt
- Not possible to extend latch by mistake
- Durable and easy to clean
- Maintenance free lock system

dana.at/magnetfallenschloss

ALSO AVAILABLE IN
BLACK MATT.

A DESIGN HIGHLIGHT
at no extra cost.

PALAIS white matt

MAGNETIC LATCH LOCK |
TWIN HINGES

TWIN HINGES

Elegance down to the smallest detail.

To lend your door support and ensure it moves flawlessly in the frame it is hung on hinges. For some people this is a tiny detail – at DANA it is a stylish eye-catcher: thanks to our **high-quality twin hinges** in a stainless steel look!

- All hinges have the same look for a harmonious overall impression, for both standard and functional doors
- Great flexibility: even after installation the door is **easy to adjust**
- Perfectly matches all fittings
- A fine design highlight with a **high-quality surface**

ALSO AVAILABLE IN
BLACK MATT.

dana.at/twinband

DESIGN HINGE
as standard on all
grooved doors.

MODUS 4 white matt

SILENT+

for even more peace and comfort.

The DANA SILENT+ package is ideal for those parts of the home where noise levels are higher – from the kids' playroom to the room with the clanking washing machine.

- Significantly increased **noise protection**
- Brings calmness and harmony to the room
- With **sound-absorbing insert** and **drop-down seal**
- With a special seal in the frame
- **Improved dimensional stability** thanks to the reinforced door frame
- Almost every DANA door can **easily be modified** with the SILENT+ package
- Can also be combined with the PROTECT+ package (see page 39)

dana.at/silentplus

STAYS STRONG –
thanks to the reinforced door frame.

DUAL 310 White matt

SILENT+ | PROTECT+

PROTECT+

For even greater stability.

The DANA PROTECT+ package is ideal for rooms in which humidity can temporarily increase, for instance the bathroom or utility room.

- Special solution for **temporary humidity increases**
- **Improved dimensional stability** thanks to the reinforced door frame
- **Coated bottom edge of the door leaf** – significantly better resistance to moisture absorption
- Almost every DANA door can **easily be modified** with the PROTECT+ package
- Can also be combined with the SILENT+ package (see page 38)

PROTECT+ BRINGS DURABILITY –
ideal for the bathroom

dana.at/protectplus

CHARISMA-DQ
Cracked oak brown float glass

WEAR-RESISTANT 2-MM-THICK EDGE.

STRONG EDGE

Even tougher than before.

DANA doors are solidly built. Special attention is paid to high-quality door edge design. Where the door is subjected to the most stress, a strong edge of 2 mm solid wood is available in all standard types of wood for DANA veneer doors. The door then retains its beauty even during the toughest daily use.

- Even **more stable and resistant to wear** when objects collide with it (e.g. vacuum cleaners, children's toys, etc.)
- The strong edge absorbs **the impact forces** and makes the door more resilient
- **Tough 2 mm** thick edge instead of the usual 0.6 mm
- **Standard on all doors in the Struktura series**
- Also available **for selected veneered doors** (not for opaque lacquered doors)

dana.at/starkkante

We have made
premium quality
standard. At no
extra cost.

Premium quality as standard.

For us, premium quality is not an “upgrade” – it is part of the package and available as standard. It is this special DANA standard that gives your door its supreme quality and uniqueness – in every little detail.

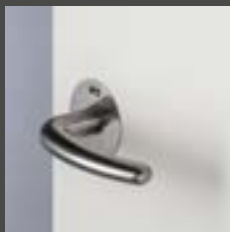

DANA BRAND SIGN

Our elegant brand sign in the door rebate signals premium quality.

MAGNETIC LATCH LOCK

Available with especially smooth closing – with the simple elegance of FLATFIX handles.

FLATFIX HANDLES

A design highlight as standard. Wafer thin and virtually flush, with the flattest rosette on the market.

THE CASING AS A DESIGN ELEMENT.

Classic elegance.

The door leaf, casing and wall clearly stand out with the grooved version.

Stylish beauty.

On DANA MODUL the door leaf and casing form a single surface.

Puristic beauty.

On DANA PLANO the door leaf, casing and wall form a single surface.

MORE ABOUT
THE CASINGS FROM
PAGE 126.

STRAIGHTFORWARD DESIGN, PERFECTLY DISPLAYED.

Private residential house.

A door need not stand out to please. On the contrary: often it is the simple things in life that give us the greatest pleasure. This was particularly true of David B. One thing was clear for him when he started looking for doors. A stripped-down, clean style of door is the ideal design element for his home.

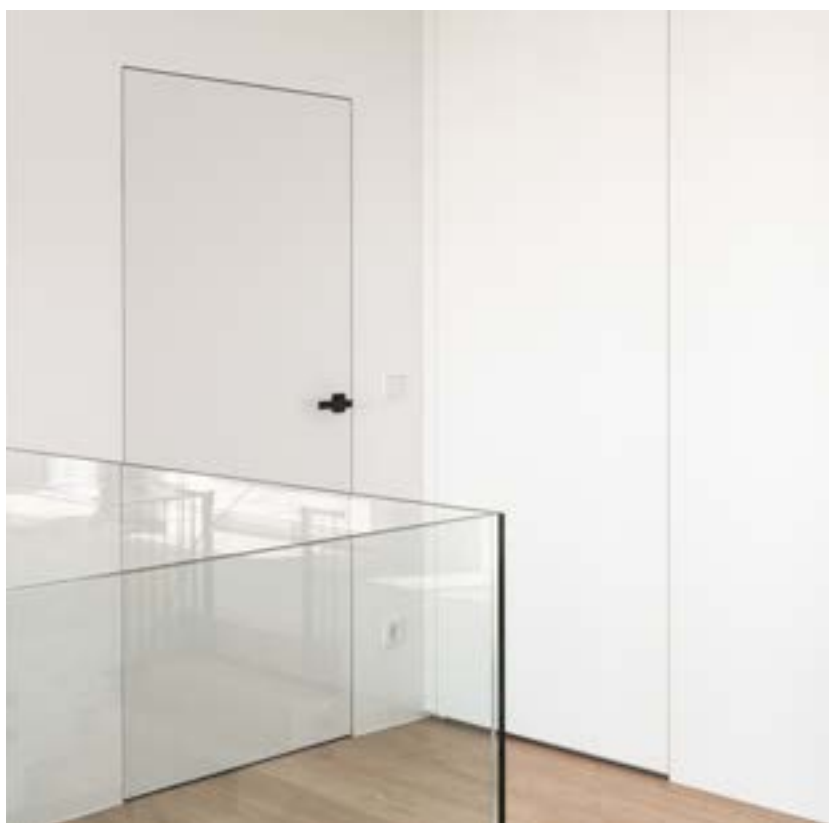

A classic door with added innovation.

During his visit to the DANA showroom in Linz the house owner was impressed not just by the KONTEXT flush-mounted door that adapts to both the wall and every style. He was also immediately taken by the DANA smartClose innovation. The door damper for soft closing with the automatic shutting mechanism guarantees a high degree of comfort and proved perfect for the unfussy interior design desired.

”

I am very pleased with the door because this model also has the integrated smartClose feature. Over the last few centimetres it closes itself – that is extremely convenient, is a sign of quality and is immediately noticeable.

David B. | house owner

OPEN. TO.

[DANA.AT/REFERENZEN](https://dana.at/referenzen)

”

I know a lot of people who have opted for DANA doors when they built their new house or renovated a building – and all of them are completely satisfied. I am also impressed by the innovations and functions, but also by the beautiful surfaces.

Andreas K.-W. | house owner

OPEN. TO.

[DANA.AT/REFERENZEN](https://dana.at/referenzen)

MODERN STYLE WITH NATURAL HIGHLIGHTS.

Private residential house.

The door to Mr. K.-W.'s living room opens into modern surroundings. Beautifully natural floors and perfectly matching DANA doors in knotted oak bring warmth and a sophisticated yet rustic flair to the rooms.

Created from the full.

The proud owner did not need to compromise on function or appearance. Innovations such as SILENT+ and PROTECT+ give you more peace and quiet in the rooms and offer optimum protection if humidity increases briefly. In terms of design, the black matt handles and door knobs set a beautiful accent. DANAmotion also impressed Andreas K.-W. – with children in the house, the perfect function: no risk of doors flying open and no more loud door slamming.

A white door with a flush-mounted handle is shown in a modern interior setting. The door is slightly ajar, revealing a glimpse of the room beyond. The handle is a simple, rectangular, flush-mounted pull. The surrounding environment includes a white wall, a wooden floor, a grey patterned rug, a white sofa, a black coat rack with a blue dress, and a white chest of drawers with a potted plant and books on top. A large abstract painting with blue and green tones is mounted on the wall to the right of the door.

Flush-mounted and

SLIDING DOORS

Room for possibilities.

Sliding doors are the grand masters of flexibility: they split rooms without dividing them permanently. Sliding doors are also real space savers – and they are available from DANA in many variations, from all-glass to solid wood, and in a variety of systems.

**WIDE VARIETY OF
SLIDING DOORS**

For more details, go to
dana.at/schiebetueren

FRONTSIDE

Elegantly hidden.

- For single-leaf or double-leaf sliding doors
- Straight-edged covering strip
- For solid and all-glass doors
- Available with all varnished and oiled surfaces (see from p. 96) from the DANA range
- With DANAmotion system
- Available with casing or without
- Solid doors optionally lockable with hinge section

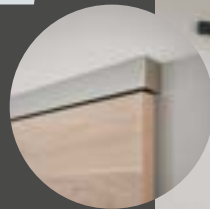

FRONTSIDE sliding door system runs in front of the wall

FLEXSIDE

Striking design, no compromises.

- For single-leaf or double-leaf sliding doors
- Narrow design profile of 60 mm
- For solid and all-glass doors
- Optional glass side lights
- Surfaces: stainless steel look and black matt
- With DANAmotion system
- Wall and ceiling mounting possible
- Solid doors optionally lockable with hinge section

OPTIONALLY WITH CEILING MOUNTING.

FLEXSIDE sliding door system runs in front of the wall

INSIDE

For endless free space.

Would you like to have even more creative freedom? **DANA INSIDE**, the sliding door that completely vanishes into the wall, makes it possible. More details on p. 33

INSIDE sliding door system slides inside the wall

**BEFORE,
BEHIND,
THEREFORE
THE DOOR.
DANA.**

BEFORE
stands a decision.

BEHIND
there is a lot going on.

THEREFORE
we are passionate about doors.

THEREFORE
your home feels more alive.

THEREFORE
we have the ideal options:
DANA.

FRAMELESS RANGE.

Flush with the wall.

Frameless, simple and state of the art: our KONTEXT door. The flush-fit design transforms the door into a striking eye-catcher in every room and also offers many additional design options. What is unique about KONTEXT is that it is equally stylish as both an interior door and an apartment entrance door, and is eminently suitable for adapting to your own individual style.

KONTEXT - DESIGN OPTIONS

VESTIBULE DOORS

Perfectly suited for you.

We all expect different things from our walls – and from our doors as well, of course. Our room dividing system with sidelight and/or fanlight offers you a wealth of individual and bespoke ways of preventing draughts and heat loss in your home – and of enhancing the look of your rooms at the same time.

So what is it that makes our room dividing solutions so special?

- They are a popular way of separating passages and rooms
- They keep cold air out
- Heat is retained in the rooms much more efficiently
- Glass elements let more light into your home

SURFACES

Diverse and truly beautiful.

From elegant to rustic, finely textured or with cracks “as nature intended” – choose from a wide range of surfaces the one that perfectly suits your own individual style. Customise every little detail of your interiors just as you like and make even opening your doors an experience to savour – every time.

Choose from:

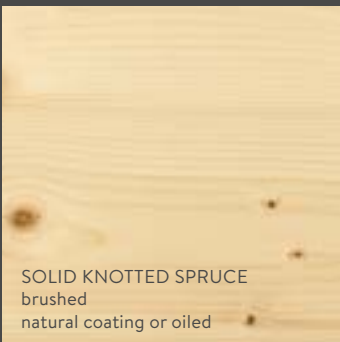

- Solid wood
- Wood veneer
- Brushed wood veneer – STRUKTURA
- Brushed wood veneer with natural cracks – STRUKTURA
- Brushed wood veneer, white oiled or varnished in white – STRUKTURA
- Brushed wood veneer, oiled brown or grey – STRUKTURA
- Partially textured varnished doors
- Varnished doors
- Glass (from p. 102)

AT ONE OF OUR DANA SHOWROOMS!

MATCHED OR PLANKED?

A natural and unique structure on every surface.

THE BOOK MATCHING SURFACE

A textural and visual highlight is guaranteed with book matching because of its “mirror style”. For this effect, every leaf of wood is turned over like the leaves of a book and glued. The result is a symmetrical pattern that can be simple or vivid, depending on the wood. With this surface, the rule is: the more vivid the grain, the more pronounced the mirror effect.

THE PLANKED SURFACE

The planked surface gives the door a boarded or natural look that is especially intriguing. It is created by randomly placing planks of wood next to one another and gluing them. This produces a similar look across several planks with a natural, decorative effect.

Birch, beech, oak, alder, ash heartwood, Canadian maple and walnut are all available as

BOOK MATCHING OR PLANKED
surfaces.

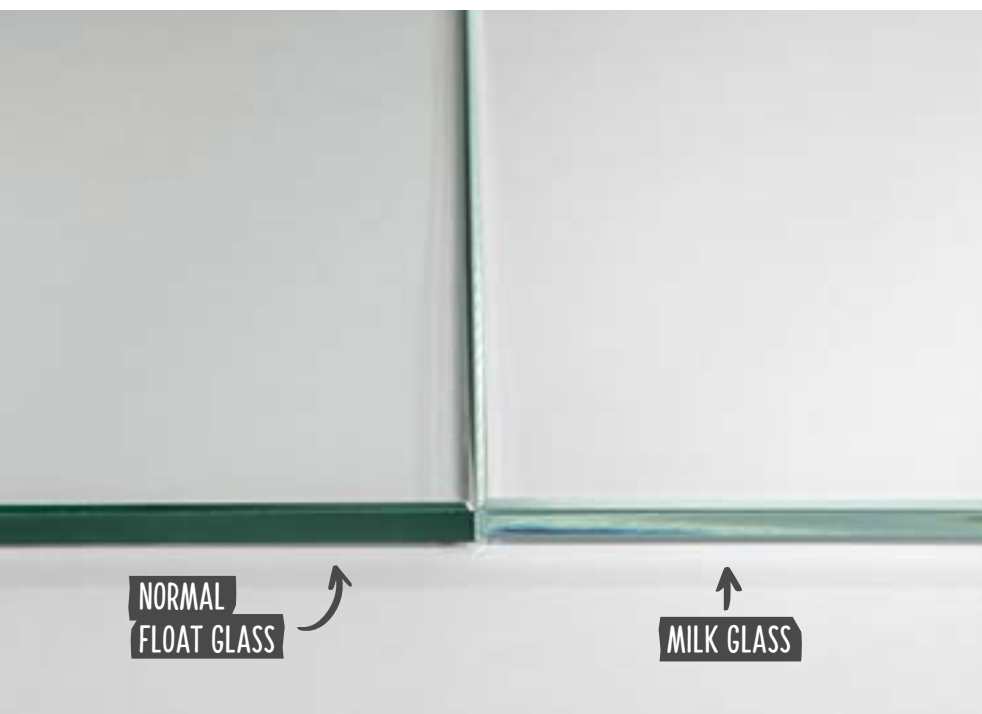

ELEGANT PERSPECTIVE

thanks to float glass.

All-glass door, milk glass

**NORMAL
FLOAT GLASS**

MILK GLASS

BRIGHT AND CHEERFUL.

Every type of glass has its own advantages. Clear glass, for instance, has its typical greenish tinge, while in milk glass there is almost no hint of green at all. Many DANA all-glass doors, glass cutouts and glass sliding doors are now available in milk glass!

- A modern, exceptional look
- Perfectly suited to all sorts of modern interior styles
- Better at letting light and warmth through – ideal in rooms with no natural light source

FIRST-GLASS DESIGN FROM DANA.

Milk glass for even more light and elegance.

BASIC GLASS TYPES

100%
TRANSPARENT

(see photo, p. 102 top)

- **FLOAT GLASS** (clear glass) or **FLOAT MILK GLASS** (clear glass)
- **SATINATO GLASS** or **MILK GLASS SATINATO**

HOW THE GLASS GETS ITS PATTERN

- **PRINT DESIGN FROSTING**
The pattern is melted into the glass at 700 °C and is durable, easy to clean and sparkling.
- **GROOVE CUT**
The popular finishing technique for an interesting texture and relief look.
- **LASER TECHNIQUE**
The patterns are cut into the glass by laser – the surface stays smooth and very easy to clean.

MORE THAN A DETAIL.

The frame for your door.

Choosing the door is not the end of the story. Because the frame also makes a decisive impression on the appearance and effect of your DANA door. There are three variants to choose from: **the wood casing, the steel casing** or the **panel frame and door frame**. Which frame in which design is the right one depends on the situation and the style that you would like to reflect in your home.

It is best to start thinking about the design and the right frames for your DANA doors during the planning phase. Discover all your options here!

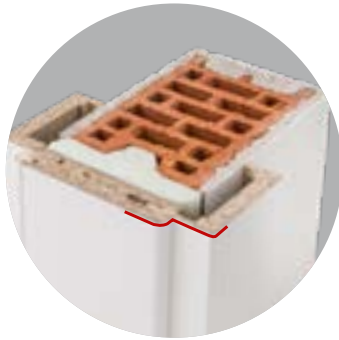

How should the door and casing look? Discover all the possibilities on p. 42 – or the wide range of design options for

KONTEXT on page 29!

THE WOOD CASING.

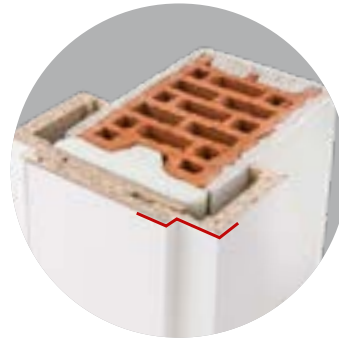

The classic door frame.

This version covers the **raw wall section**, so it does not need to be plastered. **The doors are installed** when the **floors have been laid and the walls are finished**. You have a wide range of designs to choose from: **Door, wall and frame can be flush or stepped**. The design of the frame ranges from **angular to rounded edges**. This way you can live your style down to the last detail.

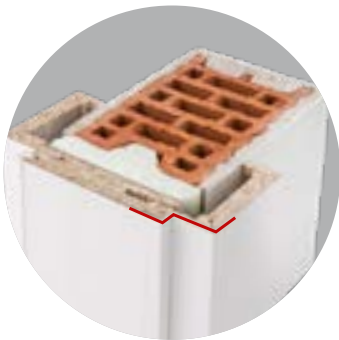

GEOMETRY OF THE F97 CASING

with rounded edges
(visible width 75 mm)

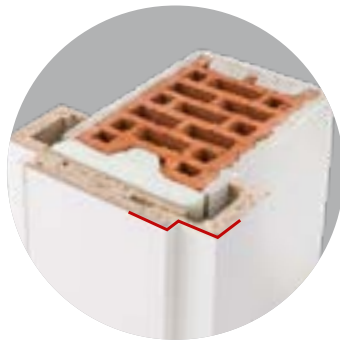

GEOMETRY OF THE P14 CASING

with clean edges
(visible width 75 mm)

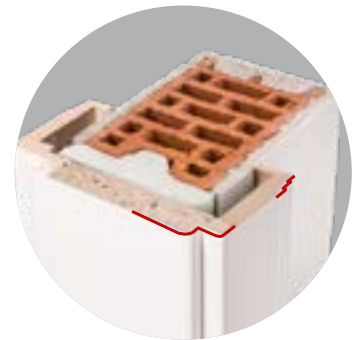

GEOMETRY OF THE STRUKTURA CASING (Z-STRUKTURA)

(single leaf, double
leaf)

RZH
Ceiling-height
frame without
cross rail, with
transom and
fanlight up to a
ceiling height of
2,600 mm (single
leaf, double leaf)

THE STEEL CASING.

The strong frame with a discreet look.

A wide range of design options for every situation and all wall types – the steel frame fits everywhere. It enables the implementation of a **very narrow visible width** for a wonderfully elegant, discreet look. Do you need to renovate existing steel frames? With our **renovation profiles** this is done in the twinkling of an eye. The advantage: **there is still plenty of clearance.**

STEEL CASING 42 PROFILE

STEEL CASING 24 PROFILE
Corner casing
Retrofit (renovation)

PANEL FRAME, DOOR FRAME & PLANO CASING

A real variety of door frames.

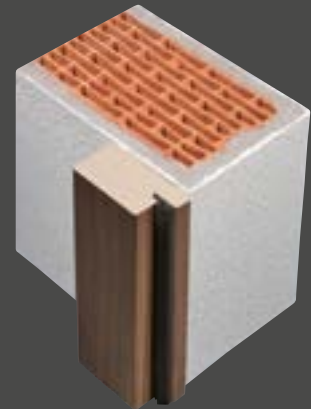

These versions are installed **on the completely plastered wall** – with recessed frame if required. This can be installed **during the construction phase**. This makes it easy to fit the frame later on. Choose **any position in the embrasure**. Panel frames can also be installed **on the wall in front of the embrasure** – to ensure maximum clearance as well as stunning looks.

BM 43/65 PANEL FRAME
fitted in the embrasure (any position)

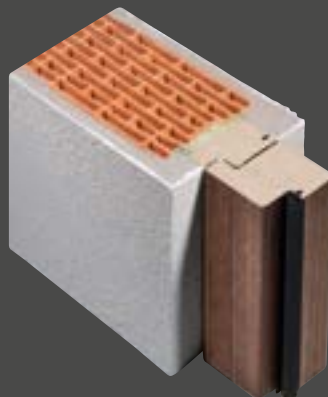

BM 43/65 PANEL FRAME
fitted in the embrasure with subframe

ENTRY DOORS BY DANA.

Protecting and welcoming.

The entry door is the gateway to our own highly personal world. It should be an attractive highlight at the entrance to our homes, inviting to visitors while at the same time providing the security and thermal insulation we need. We have created the perfect combination of stylishness and functionality, paying attention to the smallest detail.

- **Outstanding thermal insulation** – suitable for passive houses ($U = 0.74 \text{ W/m}^2\text{K}$)
- **Hard-wearing and easy-to-clean** 2-mm surface layers in many colours and designs – maintenance-free, light- and colourfast
- Door leaf and frame flush-fitting both inside and out
- **Advanced security system** up to class 3 burglary resistant (RC3)
- Noise insulation up to 42 dB
- Extremely hard-wearing and moisture-resistant cast resin edge – with two-colour option
- Glass bead for glass inlays, side lights and transom light in elegant stainless steel look – virtually flush-fitting
- Innovative fingerprint system or code buttons for maximum security – can also be extended to all other exterior doors

SIDE ENTRY DOORS.

More than a side issue.

Many houses have more than one entrance, whether these are the classic side entry from the garage or carport or from the front door of a flat into a covered access balcony in apartment blocks. At DANA, we understand the many different requirements, and here too we offer advantages in design, functions and above all security.

- **Hard-wearing and easy-to-clean** surface layers in a wide range of colours and designs
- Optional fire protection
- **Advanced security system** up to class 3 burglary resistant (RC3)
- **Excellent thermal insulation** ($U = 1.1 \text{ W/m}^2\text{K}$)
- Noise insulation up to 43 dB or optionally 45 dB
- Extremely hard-wearing and moisture-resistant cast resin edge – with two-colour option
- Available with innovative fingerprint system as an option
- Available with integrated DANA SMART DOOR system if desired

Also available
as a **DANA
SMART DOOR.**

2b

ENTRANCE DOORS FOR FLATS WITH SECURITY SYSTEM.

More security at home.

DANA also attaches great importance to the subject of entrance doors for flats since here too there is a need to skilfully combine safety and security.

- **Advanced security system** up to class 3 burglary resistant (RC3)
- Various **models to choose from** – find the right door for your needs
- Available with glass cutouts, side lights and transoms as options. Safety glass used according to the class of burglary resistance chosen
- Available grooved or as Modul or Kontext
- Complies with **climate class C**
- Available with innovative fingerprint system as an option for maximum security
- Available with integrated DANA SMART DOOR system if desired
 - DANA SMART DOOR works with Nuki
 - Keyless advantage: convenient opening and control using smart devices with the Nuki app
 - Digital access control and interconnectivity with popular smart home systems

Optional conveniently controllable using smart devices: More at dana.at/dana-smartdoor
